# Stanley Christian Darmawan

Software Engineer | Production Manager | Research and Development (RnD) Staff  
Bogor, West Java, Indonesia

## Summary

I'm a tech enthusiast with a commitment to lifelong learning, currently studying Computer Science at Bina Nusantara (Binus) University. With around a year of professional experience, I thrive on exploring new technologies and solving complex problems. I also have a strong interest in Web3 and AI, and I'm passionate about tinkering and experimenting with these technologies to continuously expand my skill set.

## Experience

StarCore Analytics  
Software Engineer  
July 2025 - Present (3 months)  
Bogor, West Java, Indonesia

Bina Nusantara Computer Club  
1 year 10 months  
Research and Development Staff  
March 2025 - Present (7 months)

Research and Development Activist  
December 2023 - March 2025 (1 year 4 months)  
Bandung, West Java, Indonesia

StarCore Analytics  
Software Engineer  
November 2023 - February 2024 (4 months)  
Bogor, West Java, Indonesia

In my part-time role, I continued supporting ongoing projects:

- Maintained and implemented new features in a desktop application built with Tkinter.
- Provided ongoing support and improvements for the web application using Node.js, React, and FastAPI.

## StarCore Analytics

### Software Engineer

June 2023 - August 2023 (3 months)

Bogor, West Java, Indonesia

Worked full-time contributing to the development and maintenance of multiple projects:

- Developed a web application using Node.js, React, and FastAPI.
- Contributed to a respondent management system built with Flask and PostgreSQL.
- Maintained and improved a desktop application using Tkinter.
- Helped maintain an internal management website built with Laravel, with a focus on implementing new features.

## Groweb

### Production Manager

March 2023 - June 2023 (4 months)

Bogor, West Java, Indonesia

As a Production Manager, I focused on managing my team to develop web applications and logos for clients. My responsibilities included:

- Leading the team to ensure the successful development of web applications and logos based on client requirements.
- Bridging communication between clients and my teams to ensure clear understanding of project needs and expectations.
- Facilitating communication between different divisions to streamline workflows and ensure project success.
- Updating team progress regularly, ensuring that projects were on track and meeting deadlines.
- Identifying and implementing strategies to help the team complete projects efficiently.

## StarCore Analytics

### Software Engineer Intern

July 2022 - December 2022 (6 months)

Bogor, West Java, Indonesia

During my internship, I contributed to several real projects, gaining experience with various technologies:

- Developed a flood mapping web application using Leaflet.js, JavaScript, and Python to visualize flood data.
- Built an internal management system using Laravel.

- Created a desktop application with Tkinter to address specific client business needs.

---

## Education
